PROFILE SUMMARY

Highly motivated and detail-oriented first-year B.Tech student specializing in Computer Science Engineering with Artificial Intelligence and Machine Learning. Passionate about problem-solving and building foundational skills in software development. Eager to apply theoretical knowledge to hands-on programming challenges and committed to continuous learning in a fast-paced tech environment. A strong communicator and resilient team player dedicated to building a successful career in software engineering.

SKILLS

- Languages:** Python, C, C++, Java
- Web Technologies:** HTML5, CSS, JavaScript, Node.js, React.js, PHP
- Databases/Tools:** MySQL, MongoDB, Unix
- Soft Skills:** Leadership, Communication, Critical Thinking, Adaptability, Intuitive, Empathy, Work Ethic, Team Work, Multi-tasking, Resilient

PROJECTS

- CalSci App | GitHub

Aug 2025

 - Built a scientific calculator desktop application in Python, supporting arithmetic, trigonometric, logarithmic, and exponential operations.
 - Designed a clean Tkinter-based GUI allowing users to switch seamlessly between standard and scientific calculation modes.
 - Implemented robust error handling for invalid expressions and edge cases such as division by zero and domain errors.
 - Structured the codebase with modular functions for parsing and evaluating expressions, improving readability and maintainability.
 - Tech Stack:** Python, Tkinter
- Alarm App | GitHub

Nov 2025

 - Developed a desktop alarm clock application in Python supporting multiple simultaneous alarms with custom labels.
 - Integrated real-time system clock tracking and threading to trigger alarms accurately without blocking the main UI.
 - Designed an intuitive interface for setting, editing, and snoozing alarms with audio notifications.
 - Implemented persistent alarm storage so scheduled alarms are retained across application restarts.
 - Tech Stack:** Python, Tkinter
- 3D Nature Website | GitHub

Feb 2026

 - Designed and built an interactive 3D nature-themed website using Three.js to render trees, terrain, and dynamic lighting in the browser.
 - Implemented smooth camera controls and animations, allowing users to explore the 3D scene across devices.
 - Optimized rendering performance by efficiently managing geometries, materials, and textures for faster load times.
 - Styled the surrounding UI with HTML5 and CSS3 to complement the immersive 3D experience.
 - Tech Stack:** HTML, CSS, JavaScript, Three.js

CERTIFICATIONS

- Cyber Security** — Acquired a foundational understanding of network security, digital threat mitigation, and data protection principles; gained insight into identifying vulnerabilities and implementing basic security protocols.
24 April 2026
- C Language** — Developed a strong command of core programming concepts, data structures, and memory management through hands-on coding; used this to solve logic-based challenges and build terminal-based applications.
20 May 2026

ACHIEVEMENTS

- Secured **2nd Runner-Up** position in a college-level Hackathon, competing against multiple teams with an innovative project solution.

EDUCATION

- Lovely Professional University

Bachelor of Technology - Computer Science and Engineering (AI & ML)

Kendriya Vidyalaya No. 2, Jammu Cantt
- Phagwara, Punjab, India

Aug 2025 - Present

Jammu, Jammu & Kashmir, India

Senior Secondary Education

Kendriya Vidyalaya No. 2, Jammu Cantt
Matriculation

2024 - 2025

Jammu, Jammu & Kashmir, India
2022 - 2023
